

DEWEY &
AQUA SENTINEL
IN

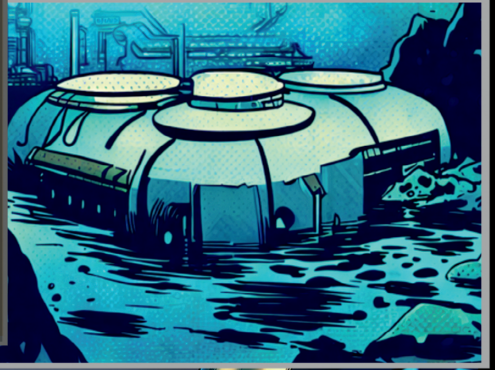

THE TRASH TITAN TUMULT

INTRODUCING DEWEY'S
NEW SIDEKICK:

AQUA SENTINEL

Beneath the ocean's depths, Dewey is captive in an underwater stronghold. He battles to untangle the mysteries surrounding his sudden confinement...

I don't remember how I got here. We were following the plastic waste and...

WAIT! What happen to my Sidekick?!

Meanwhile, Dewey's sidekick attempts to rescue him when he runs into a problem...

I've located the control room! Time to figure out how to gain entry.

It's a tad compact, but I believe I can fit.

UNAUTHORIZED ACCESS | ALERT |

BZZT---ALERT!

BZZT---ALERT!

BZZT---ALERT!

UNAUTHORIZED ACCESS | ALERT |

I'M in!

Once I disable this alarm I'll set you free, Dewey!

I'm afraid I cannot let that happen.

Whatever you did, it worked. I'm free. Where are you?

I'm in the control room. The Waste Wizard has me cornered!

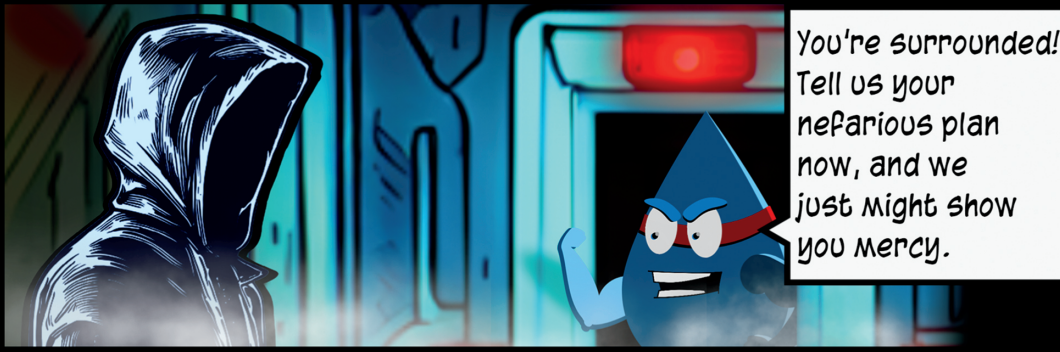

Hang tight! I'm on my way!

PitiPu! Pools!
Do you really believe **YOU** possess the power to escape and thwart my plan?

WHAM

THUD

You're surrounded! Tell us your nefarious plan now, and we just might show you mercy.

My plan is already set in motion. I shall never divulge the details. Especially to the likes of YOU!

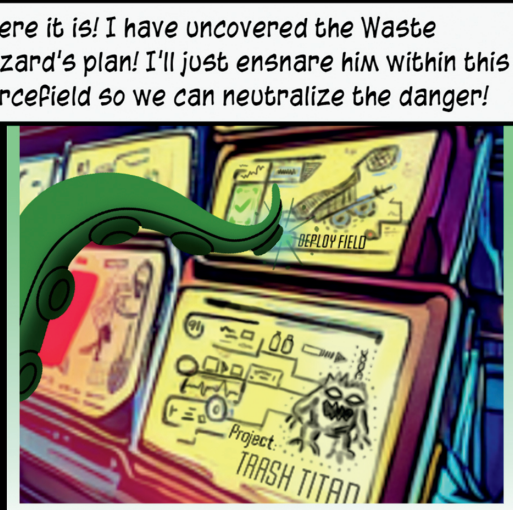

Your resistance may flow like an unyielding current, but we shall breach the depths of your scheme!

KRR-BOOM

Dewey, keep him busy! I'll dive into his database and see what I can uncover.

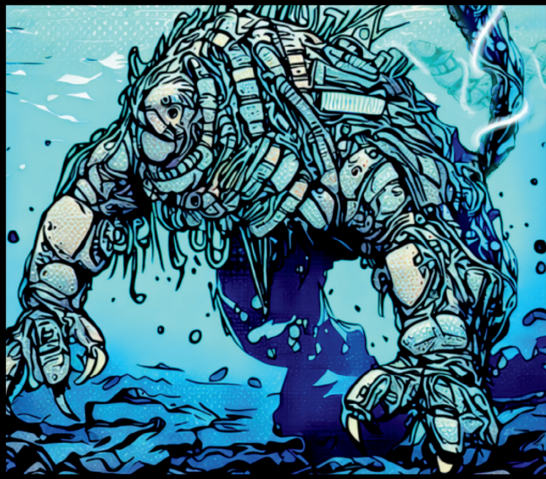

There it is! I have uncovered the Waste Wizard's plan! I'll just ensnare him within this Forcefield so we can neutralize the danger!

So you managed to infiltrate my computer database and find my plans. Your efforts are futile, for you are too late to stop my **TRASH TITAN!**

Even in this very moment, it is near full strength, fueled by the world's plastic waste. There is no recourse, for the flow of plastic waste into the ocean is relentless!

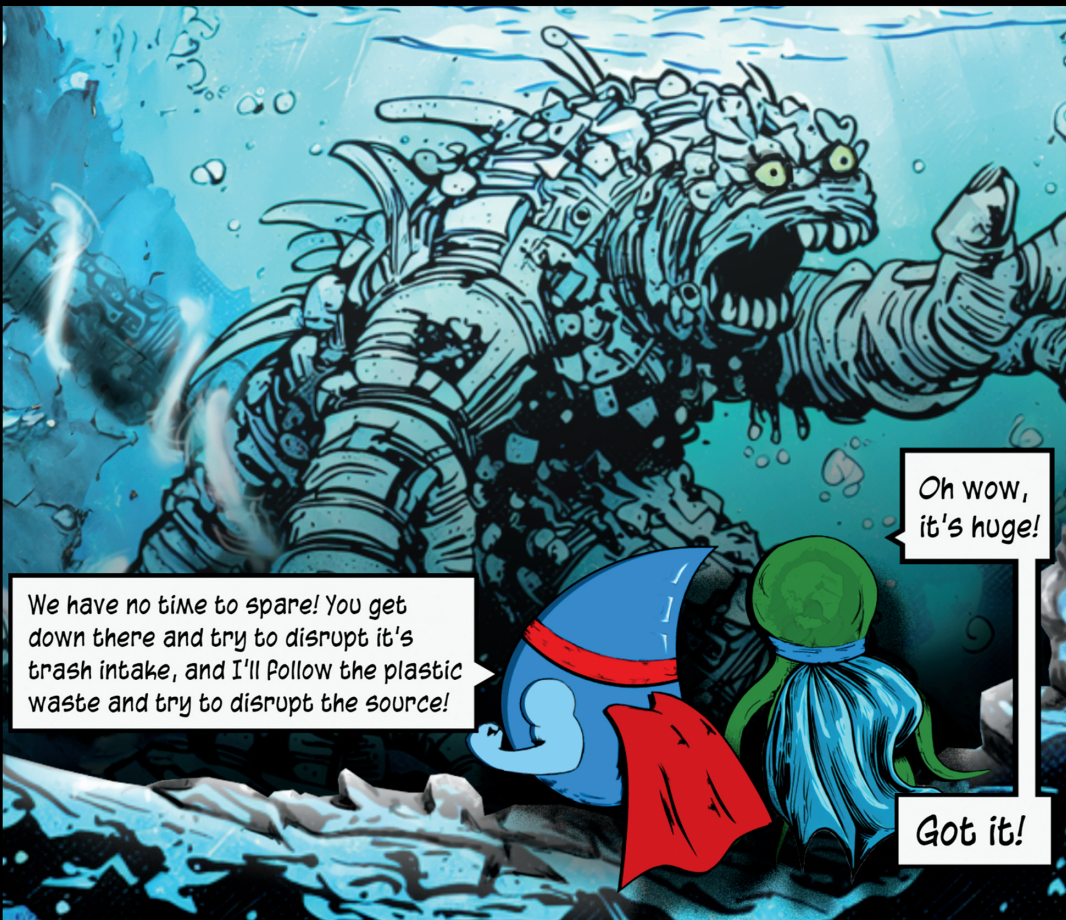

But that will destroy the ocean!

I can already feel the planet hurting!

Come, Aqua Sentinel,
Let us swiftly depart!
We must find this Trash Titan
and formulate a plan before
it is too late! We will let the
authorities deal with him.

We have no time to spare! You get
down there and try to disrupt it's
trash intake, and I'll follow the plastic
waste and try to disrupt the source!

Oh wow,
it's huge!

Got it!

We need your help!
The Waste Wizard has unleashed a Trash Titan upon this planet...

Fueled by the world's plastic waste, it aims to destroy everything we hold dear...

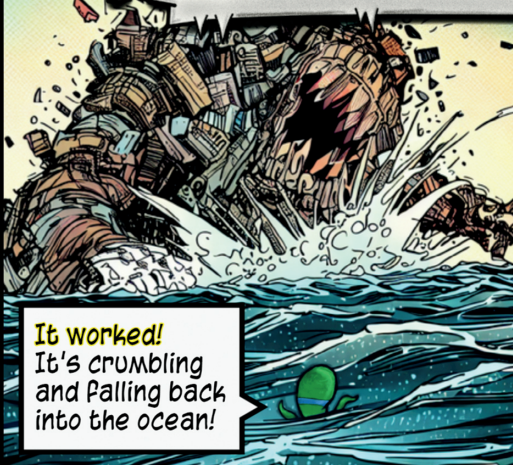

Recycle plastic!

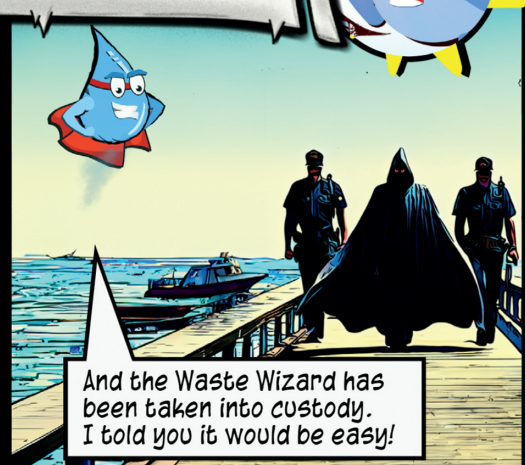

Use Reusable!

NO SWEAT, NO FUSS, STOP PLASTIC WASTE WITH US!

It worked!
It's crumbling and falling back into the ocean!

And the Waste Wizard has been taken into custody. I told you it would be easy!

As we clean up the ocean together, always remember: by following these simple steps, we can effortlessly thwart the threat of plastic waste!

THE END... FOR NOW

AQUAVERSA

Take a look at Multipure's Aquaversa: it's powerful, it's convenient, it's easy to use, and it's affordable. No wonder it's one of the most popular countertop and under sink filtration systems we've had to offer.

AQUAPERFORM

If you want a countertop or under counter water filter system that offers superior performance and convenience, consider the Aquaperform. This system is perfect for anyone concerned about the presence of Arsenic-V and many other contaminants in their water. It is a water filter with performance beyond the norm.

AQUALUXE

The Aqualuxe gives you the best in modern drinking water filtration. It is the only water filter machine to feature Multipure's proprietary PureBlock™ technology to remove bacteria, viruses, and parasites in water. The Aqualuxe goes above and beyond other water filters to dramatically reduce not just that, but also the "forever chemicals" PFOA/PFOS, microcystin, lead, disinfection byproducts, and much, much more.

AQUAMINI

Simply unpack it from your suitcase, connect it directly to the sink faucet, and you have cleaner, better tasting water at your convenience. When it's time to leave, unscrew the faucet connector, pack the Aquamini back into its carrying case, and put it right back into your suitcase to take along on your next adventure. It's that simple.

YOU NEED TO DRINK MORE WATER
